Let's get started earning!

Technique 1: Affiliate/Advertising Marketing Possible Earnings: \$550+
What can I spend that money on? This technique is extremely easy and is truly entertaining and allusive for beginner entrepreneurs. You are going to choose a random popular genre that analyses statistics with SEO techniques (Income Makeover will teach you this.). Next, you will create a site that will attract a large number of visitors. Then, you will apply monetizing techniques such as CPSMS, CPA, Ads, PPD, etc, and attract high volume traffic. This takes a quick maximum of 1 – 2 hours to setup and will be completely on autopilot once complete. Your estimated earnings will be \$550+, however, this tested method can exceed \$1000 when executed with focus. There is no further investment required.

Let's get to it!

Let's get down to business. Before starting this method, it is required that you sign up for software, etc. Then, sign up to a CPA site that provides cash.

Here are a wide range of trusted examples: CPA Lead, CPAGrip, and CPA Build.

- Sign up to an advertising/publisher network: YouTube Facebook Weebly Discord Income Makeoverings.
- Download a video editing/photo editing software: Photoshop Open Shot Open Broadcasting Software Camtasia and that's it! Once you have followed and achieved the requirements you can start using the technique!

Technique 1:

1) Alright! You have fulfilled the requirements and it's time to start earning! First, locate a popular niche or multiple niches. This basically means a

game, movie, genre or literally anything popular! When this method was tested, then introduced a game genre. If you are having trouble understanding here are some niche examples from which you will create the final product. Some examples include; “game hacks”, “unlock new movies”, “gift cards”.

All these have something in common, your free commodity.

2) Now that you have chosen a niche, it is time to test if it is popular enough. Now this is where you will need basic SEO techniques. This book will teach you how. First, you want to go ahead and reach the site: google trends, a SEO site designed to analyse and represent the popularity of a keyword. Now, we will need multiple keywords to advertise and share our site. Choose an important niche. Income Makeover™

3) Input your niche (can be a game title, movie, etc), and let's analyse the data. Here is an example of a very popular niche with popular categories due to numerical values and graph ratios. As you can see the game rose up to a value of 100 at one point. This means that the keyword/niche is excellent and highly recommended to use. Make sure your niche looks higher, similar or the one on this graph.

4) Elaborating further, now that you have discovered your niche it is time to create a site where your cash will flow. For this example, this book will be executing a site via CPALead. Your customised site will vary depending on the niche. To have a maximised income, you will be required to use imagination and diversity to attract visitors.

5) Once you have signed in your PPC/CPA site of choice, it is time to distribute a nice-looking attraction. First, create a locker site via using a template. For this example, Income Makeover will execute a locker site that will award users with “vbucks”, a virtual currency. Your site can lock a secret unreleased movie, provide a game hack, give virtual currency or reward gift cards, use your imagination!

Template Examples: <https://i.imgur.com/vLUP62h.png>

6) You can edit your template by adding custom titles such as “Free Gift cards, Etc.” and adding images/logos. Here is an example that Income

Makeover created within only 5 minutes! Make sure to make it look legitimate and provide prizes that seem redeemable to your customers. BONUS TIP: If you are having trouble sparking a page, you can choose already made pages via the homepage of your CPA site. If your site does not have premade templates, here is a standardised setting fluctuation to edit! Pre-made template settings <https://i.imgur.com/NUx0n0N.png> <https://i.imgur.com/bLle8CL.png> Final product: <https://i.imgur.com/nA2P7lf.png>

7) Once you have finished your locker page it is time to advertise it. Now this is the hard part of the method however, Income Makeover will make it extremely easy to execute and receive traffic. There are numerous ways to advertise your locker effectively and with ease. With this book, it will provide many diverse ranges of methods to support you. The most popular and easiest way to earn traffic is through YouTube. YouTube can allow you to provide "proof", with SEO techniques such as keywords. Here are keys to distributing a video? Here is where Income Makeover will help you.

8) First, record yourself browsing your site and completing an "offer". Now promote this with sophisticated luring techniques. You want to scroll down, browse slowly and make sure to include a voice-over/text. After this you want to "complete an offer" (you don't have to) then include proof that you have received a prize. This can of course be fake, but you must include innocent and trustful distribution to viewers. If you don't have a form to create your own proof, you can easily re-employ other content by doing this: Search your niche on YouTube with the recommended title e.g., "free gems in clash royale hack generator". Find a video which pursues a type of proof distribution and copy the link.

Go to <https://ytcutter.com> and paste in the YouTube video link and trim the video with your desired measurement. And walla! You now have some proof!

9) Now that you have gathered your resources, compile all the files into a video editing software (i.e., Camtasia, etc.) and edit your video in a professional manner. Add music, effects, etc. and make it look realistic.

Next, upload your video to YouTube and add basic features such as a thumbnail (created by Photoshop), a title and some keywords (most important!). Congregate some keywords by inputting your title on the site: <https://rapidtags.io> Keyword examples include, “free fortnite vbucks!”, “how to get free giftcards 2020 new!”, etc.

10) If you need further help relating to titles, tags, etc., check the Technique 1 Resource Package for examples and fluctuations.

11) Sadly, promoting your landing page on YouTube won't be enough. The next most popular traffic network is Twitter/Facebook.

Sign up to either <https://twitter.com> or <https://facebook.com> or both. Here are the steps for promoting on Facebook and Twitter (much easier than YouTube):

Twitter:

1) Sign into a new twitter account and generate a username relating to your niche. This includes, “FreeVirtualCurrencies”, “GiveawayHub”, etc., use your imagination! Import a nice-looking profile and banner. Here is an example:

2) Now that you have a profile it is time to promote! There is a diverse variety of methodologies for which to distribute exposure, however, let's start with the most simplistic method, creating a post. Create a post on your twitter profile with a description. Once you have provided a description, go onto <https://bit.ly> or any other link and shorten your landing page. This is so twitter doesn't recognise it as a “scam page”. Furthermore, we need some tags to get more exposure, navigate to <https://seekmetrics.com> and input your niche, then collect some hashtags and post your new profound advertisement! You can add images such as gift cards, etc. to make it more alluring. Here is an example!

3) Once that is done, you can further expose your link by replying to famous related icons. For example, if I was giving out free robux, I would reply from my post to users who relate to roblox on twitter. This will create further engagements and exposure, ultimately leading to more cash in your pocket. For facebook, literally duplicate the steps, however, make sure to create a facebook page as well as profile for advertising!

Congratulations! You have mastered the first technique. Congratulations, you completed the first technique. To promote and further maintain your landing page, continue to post contents regularly on YouTube, etc. and spread your imagination to a variety of different networks.

BONUS TIPS:

- You can further advertise your landing pages via discord servers and discord messaging!
- You can create a site with Weebly, etc. or plain script then integrate multiple landing pages for extra earnings.
- Generate more than one type of niche for extra earnings.
- Manipulate multiple CPA sites.
- Merge your landing page into an app and share it as an APK (Android) or IPA (iOS) for more earnings.
- To withdraw with bitcoin, etc. use paxful.com or another PayPal to bitcoin conversion site!

Proof of earnings: Here is how much Income Makeover generated by using this exact technique for 2 weeks! We weren't lying, this is a great method! CPAGrip paid the most! CpaLead: CpaGrip:

Technique 2: Discord Server Monetization Possible Earnings: \$800+ What a pay out. Discord, one of the most famous and trusted chatting services for gamers. It has a clean layout and provides an amazing place for communities, chatting, etc. However, Discord is a cash tree, you generate thousands of possible incomes with complete ease. In this technique, Income Makeover will explain various discord earning techniques and explains how you start making easy money, from sitting simply at home and completing tasks on a messaging app. Methods take mere minutes up to a maximum of 2 hours. Some are autopilot while others require little work. It's time to earn like a professional! Excited? Well let's get earning! Requirements. Let's check the list. Before starting this method, it is required that you sign up to these sites and fit other requirements such as software's, etc. Let's get to it! Required sign ups/preparations:

- Create a new discord account.

- Create a playerup account.
- Setup voucherify. (Leave this site open)
- Linkvertise account.

Technique 2.

1) Well now that you have gone through the requirements it is time to start this method! In short terms, there will be 2 methods regarding discord. The first, insinuating discord monetization with referrals, link monetization and server selling. This is extremely simplistic and will require almost no effort. The second will require you to create another discord account and purchase nitro, we will then sell the account and refund nitro for your financial gain. This is once again simplistic and takes mere seconds to setup! You can select one or both methods to start earning cash. Discord Server Method.

2) We are going to make a discord server. You will need to make a discord account (which you should already have) first to create this server. To generate a server, click the plus icon on the top right of your discord layout. This will prompt some settings to adjust for your server, this includes a title and server image. Now the server in which you are going to make will need a basis. Income Makeover has provided multiple award servers, gift card servers, etc. + free custom gif for your profiling image. Check the technique 2 resource package and select a title/basis for your server + an icon.

3) Once you have completed making the design of the server, it's time to add some content. Make multiple channels including a #announcements, #welcome, #drops and #invite-rewards. These channels are all needed to properly sustain and grow your server. A few images/examples have been provided to help you create content.

4) Once you have completed making channels, you will need to advertise your server. To do this you will need to integrate a few bots/sites to help you create an effective server.

Here is the list of bots and sites you will need to use:

<https://giveawaybot.party> <https://top.gg/bot/409875566800404480>

<https://mee6.xyz> <https://disboard.org> <https://discord.me/servers>
<https://discordservers.com> <https://discordsl.com>

5) Once you have integrated a sign up or invitation for each of the discord features, here is the explanation of each bot/site and a short summary of each distribution and its effect on gaining members.

<https://giveawaybot.party> – You will be using this bot to host giveaways; this will attract and persuade members of your server to trust its compilation and engage in action. Use this bot to create giveaways.

However, with giveaways we need prizes. You can use this giveaway feature with voucherify.io. Using voucherify, you can generate random codes. These codes can then be used for giveaways. In the resource 2 package, different code regex (code combinations) ranging from xbox to steam have been provided. Use this site to generate random codes, which ultimately lead to prizes! This may sound confusing so here is an example.

<https://top.gg/bot/409875566800404480>

Invite manager is self-explanatory, it is a bot that will allow users and yourself to track invites. So they can receive and collect status, eventually leading to their “prize”. (Hint: You won’t be giving prizes; this is just so your server can grow!). <https://disboard.org> <https://discord.me/servers>

<https://discordservers.com> <https://discordsl.com> – All the sites listed above including package bots which are used to advertise your server. You will be able to list your server on each of the sites, supplying a mass wave of invites towards your server!

6) Now that the bots are done and we have an advertising factor on your server, let’s add monetization techniques into your server. This will start to get your money flowing! Income Makeover has provided multiple methods which can be used to earn big cash.

The first method is to utilize a drop channel in which “prize drops” are shared. These prizes are then monetized with short links and soon enough, referral demands to provide you cash. You will need to first collect some prizes. Now where can you possibly generate prizes without spending a dime? There are many techniques and here is a list of some: Generating codes via voucherify.io: This is self-explanatory, using regex combinations

codes ranging from steam, etc. and there you go! You have some gift card prizes. Integrate these gift cards into a site such as <https://pastebin.com> and then monetize the links on linkvertise. \$\$\$ is flowing through your account! You can provide 5-10+ drops every day. Here is the basic maths of what you would earn. If you had 2000 discord members and only 50% clicked on 10 links, you would get \$100-200 from linkvertise everyday by literally clicking buttons! Example: Grabbing accounts via forums: you can grab accounts/resources from forums such as nulled.to or cracked.to then apply the same process of monetizing the accounts by placing them in <https://pastebin.com> then applying a linkvertise monetization distribution. Here is a list of forums/sites where you can get some resources:

<https://cracked.to> <https://nulled.to> <https://hackerforums.net>
<https://hqcombo.com> <https://combo-list.com> <https://priv8.to> <https://sinister.ly>
<https://freeaccount.biz> <http://bugmenot.com>

7) Now that you have some resources, giveaways and a little bit of monetization, it's time to share your affiliation links. This is the most profitable part and can earn over \$500, when done correctly. You will first need to sign up to some affiliate sites. Here are some examples, if you know any other affiliate sites (sites that pay you for referrals) use them!

<https://www.pointsprizes.com> <https://www.prizerebel.com>
<https://packetstream.io> <https://provider.fluidstack.io>
<https://www.g2a.com/goldmine> Income Makeover™

8) Once you have signed up to any of the affiliate site/sites, integrate them to your servers. To do this you are going to simply compile a message into a channel promoting these sites. Now this is good and will provide some traffic, however, you will need to add some "spices" to make these sites more persuadable. This includes generating your own message that goes along the lines of "Hey guys! Sign up to these sites and use them for at least one week! If you do this, I will personally give each one of you nitro! This will occur due to profits made: D", this is simply one example ad it is recommended you make your own. You do not need to make the promise, this is just a marketing technique.

9) Congratulations! You have completed the monetization of your server. To finish off the server method there are a couple more steps you will need to complete to earn a major cash amount. The first will require you to join servers (can be found via the sites in which you advertise your server) and message people with pre-made SMS advertising templates. Simply join a server and message multiple members with the SMS templates. Here are some images to help you out: Income Makeover™ 2020 | Official eBook |

10) It is finally time for the final step of this server method, selling your server. Once your discord server reaches at least 900+ members, it can then go for real money exceeding \$50-100+ depending on customers and members. Using player up, create a new thread promoting your server and your sale price. Here is a list of rates you should go by for quick sales: 500 Members: \$45-\$50 1K Members: \$85-\$100 2K Members: \$150-\$200 3K+ Members: \$200-\$500 Congrats you're done! You did well! You will cash in with Goodluck earning on discord server! These steps can be completed unlimited times, generating amazing incomes!

Technique 3 Bitcoin Scripting/Method Possible Earnings: \$960+ Too good, we are making \$\$\$\$. This technique will require you to bet bitcoin on trusted sites and in return receive massive profits that can 50x multiply your investments. A huge gain. This technique will offer tips, strategies, programs and private scripts to get you earning effectively, cheers! This method is different from the rest due to it being and a little risky. Be warned, you may lose investments and/or gain \$\$\$\$. It is good gambling and a little risky. Generate the money!

Requirements: This is going to be easy! Gambling sites to register:

- Bustabit/Alternatives
- Bitcoin Address Scripts for sites
- Resource 3 Folder

Technique 3.

1) Before even starting this technique, note the requirements.

First there will be 2 different methods in this technique; a private scripted bustabit script/s which will allow you to make money safely, with little risk. Remember that you can lose something! Method 1 will require an

investment of \$5+. You will return profits maximised at \$30-\$500 per day!
Just do it!

Bustabit Method:

2) Introducing this method, you will be required to invest \$5 into bustabit.io, a crash bitcoin-based gambling game. It is 100% trusted with an average of \$1000 invested, per 5-60 seconds! To deposit, register an account and select a cashier, send \$5 in btc (Approximately 0.00068btc) to the labelled btc address.

3) Once you have invested \$5, put \$1 worth of btc into the bankroll (100 bits). This will ensure profit on autopilot in case you lose any earnings.

4) Once you have invested some \$\$\$ for future profits, it is finally time to gamble!

Bustabit is a thrilling social bitcoin gambling game. It's a real time, simple, and exciting game where you can securely play for fun or to win a fortune. During each round of the game, you can place a bet before the round starts. Once the round begins, a lucky multiplier starts at 1x and begins climbing higher and higher. At any moment, you can click "Cashout" to lock in the current multiplier which awards you with your multiplied bet. Every round is a fight between risk and reward. Do you cash out at 1.1x for a conservative win? Or do you stay in the game to hunt the high 1000x multipliers?

5) Now that you know what in the world bustabit is, what is the strategy? You will get a chance to choose a script, which will automate betting safely, with maximized profits. These scripts are 100% autopilot, meaning you can earn big money by doing nothing! Your scripts can be found in the resource 3 folder. You will be required to leave a device (PC, phone, etc.) on for as long as you like. Here are the descriptions for each script: Average + \$60 - \$180 Per Day: This script is \$0.10 per bet and applies a 1.1x bet multiplier. Every win will reward you with a \$0.01. Now this may not seem much, however, this will award approximately \$0.12/minute. This means you will earn \$7.20 per hour, excluding losses (Losses may vary from \$0.00 to \$7.20). This conclusively leads to an average \$60 - \$180 per day! Super Safe with earnings of + \$15 - \$30 Per Day. Same as the average \$60 -

\$180 per day script except a minor betting differentiation, including a shortened bet of \$0.01 with a higher multiplier. Safe Martingale + \$60 - \$100 Per Day

This script integrates the old 18th century concept of Martingale. This includes that with every loss, the bet multiplier is increased, doubling your earnings. Safe Martingale bets \$0.01 per bet with a 2x multiplier and increases on loss. After Income Makeover research and testing, this script earned an average of \$60 - \$100 per day after a week of trials and earnings of a sum of \$2.50, per hour. Super Risky Martingale + \$300 - \$500 Per Day. Same as the Safe Martingale at + \$60 - \$100 Per Day except a minor betting differentiation, including an increased bet of \$1 with a higher multiplier. After Income Makeover research and testing, this script earned an average of \$300- \$500 per day, after 4 days of trial at \$12.50 per hour. Sniper Copy + \$\$\$\$Random Per Day This script is quite different than others, it allows you to choose a random user and copy their exact action. Income Makeover's personal achievements from this script varied from \$600 - -\$300 per day with earnings \$310 profit. It is extremely risky, however, with research and simulation of a user, you can achieve max profits. That's it! Simple wasn't it? Good luck!

Proof of earnings: Here is how much Income Makeover generated via using this exact technique for 2 weeks! We recommend this for easy, major earnings. Each script was used for approximately 15 – 24 hours straight, for 2 weeks on 5 separate accounts. Total Received Via Bitcoin! Income Makeover™ 2020 | Official eBook | Any leaks will result in lawful prosecution. Investment Stats: Average + \$60 - \$180 Per Day with \$13 invested, \$63 return. (3 days) Super Safe + \$15 - \$30 Per Day with \$5 invested, \$120 return. (6 days) Safe Martingale + \$60 - \$100 Per Day \$25 invested, \$200 return (2 days) (\$-120 profit, \$320 previous total.) Super Risky Martingale + \$300 - \$500 Per Day \$50 invested, with a \$290 return. (1 ½ days) Sniper Copy + \$\$\$\$ Random Per Day with \$10 invested, \$30 return (6 hours) Bonus! Bet Big - Win Big + \$1000+ Per Day at \$100 invested, \$85 return (1 hour) Grand total: \$788 USD [Excluding Transaction Fees]

Good luck with your earnings!

Technique 4:

Steam Key Manipulation Possible Earnings: \$500+ Bring the \$\$\$ home? In technique 4, you will be conducting an operation in which you will gain steam keys for free via multiple sites, legally. After this, you will list these steam keys as a specialized product and sell them at an individual price on multiple shopping ecommerce sites like eBay, etc. combined with automatic viewing bots customized by Income Makeover to boost sales. Furthermore, you will learn some advertising and persuasive techniques to help you get going! Estimated profits exceed \$500 your input to just click a couple of buttons and copy & paste information.

This is going to be a breeze! Before conducting method 4, you are going to position and consolidate with a few requirements. Sites: Ebay/Any other ecommerce site. Steam accounts(5x+) Marvelousga (Leave this site open) Dupedornot (Leave this site open) Gamecode.win (Leave this site open) Grabfreegame (Leave this site open).

1) First and foremost, you will use some working steam keys. This can be done via the free steam key sites provided. What you are going to do is create multiple steam accounts via steam, then, sign up to these sites and gain at least 20 keys. Once done, you are going to create a sales list on ebay and sell these keys for our recommended prices. A private bot programmed by Income Makeover will be implemented to boost sales.

Gaining steam keys:

2) The first site in which you are going to visit is Marvelousga. This website provides free steam keys for completing simplistic offers (NOT SURVEYS!) like clicking sites and joining steam groups. Predominantly, make sure you have more than 5x steam accounts which you created in the steam website. Once you have visited marvelous ga, sign up with random information. Income Makeover™ 2020 | Official eBook | Any leaks will result in lawful prosecution. Income Makeover™ 2020 | Official eBook | Any leaks will result in lawful prosecution.

3) Once you have signed up, its time to grab some keys! Grab all the keys from offers and start completing simplistic tasks for some of these keys.

You must connect a steam account to do so, this account must be the new one you created, using this method. Income Makeover™ 2020 | Official eBook | Any leaks will result in lawful prosecution.

4) Once you have collected the maximum keys for one account, repeating with the additional accounts you created via steam. Create a new marvelous account for each new steam account. After completely maxing all your keys for every account, implement them into a notepad document and move to a new site. Dupedornot, Gamecode and Grabfreegame work the same as marvelous ga. You will repeat the steps provided to increase your earnings for each of these sites. Now doing the maths, you get an average of 15 keys, per site per day. This means you get approximately 45 keys per 5 steam accounts. This is a lot of keys and is more than enough for your steam key business.

IMPORTANT: Make sure to check your steam keys via this link: <https://store.steampowered.com/account/registerkey>, cancel the redemption so you activate the key! Earning stacks of \$\$\$.

1) Now you have the stock of working keys, it is finally time to distribute them on a marketplace. Income Makeover highly recommends eBay due to high traffic rates and easy marketing sustainability, however, you can fluctuate marketplaces if you would like. Further examples will be conducted on eBay.

2) Once you have created setup payments methods, etc. with eBay, it is time to create a listing. Proceed to the sell tab by clicking the label on the top right.

3) Continue by filling out a listing page selling steam keys. A whole variety of examples including titration.

4) Once you have generated your listing, it is time to boost it with secretive techniques that you will find nowhere else! 3) Now that you have a source page that exchanges bitcoin for a “hack” it is time to promote this page so you can start earning some cryptocurrency! YouTube is recommended. Using any screen recorder (OBS is recommended), record yourself, using inspect element (to fake proof) in your chosen script. You can edit your video by adding watermarks of your script payment and music, voiceover, etc. Here is an example of using blockchain! Use your imagination and remember to make it as legitimate as possible.

4) Continuing further, once you have created your video, it is time to upload it to YouTube. Now, this can be promoted as either a static video (simple upload) or live video. Or both (recommended for major earnings). As always with YouTube, you will be required to implement SEO techniques, to include a thumbnail, titles, keywords and valid descriptions. Income Makeover will guide you through this and provide examples to prevent any troubling behaviours.

5) Once your uploaded video has been initialized it's time to integrate some features. First things first, it is recommended to include an eye-catching title. Include titles such as: HOW TO GET FREE BITCOIN WITH THIS AMAZING SCRIPT | UPDATED & WORKING | \$5K PER DAY! Once you have assigned a title, include a description and make sure to import your links! Use <https://bit.ly> to shorten them so it bypasses the YouTube spam filter. Provide a thumbnail (Extremely important!), by making your own, if that is not possible, choose a folder of scraped YouTube successful thumbnails included in the Resource 5 Package. Make sure to include tags as well! This is in the Resource 5 Package and is the most important SEO promotion for your video.

6) You have finally released a live streaming video advertising your chain, constantly promoting your link and inevitably, increasing your income stream drastically on autopilot! To further increase your income, you can promote your site on other social media(s): Instagram, Facebook, etc. you can use sites such as YouLikeHits, GrowViews, View2be to grow your video and increase traffic, absolutely free. *Earning records were not committed by Income Makeover relating to this method but rather analytics of other successions obtained by other precursors of The Earnings. Technique 6: Social Media Explode! Possible Earnings: \$2000+ Bonus Method! What am I going to do? Number 6 is dynamite and will require you to do simplistic, legal precautions that involve Instagram, allowing you to earn thousands of cash with ease and in just the click of a few buttons, and the generation of text. You are literally going to make an Instagram account involving a list of popular niches. Next, you will post photos with SEO tag techniques and a tag scraper program (valued at \$100) by Income

Makeover to help gain followers and their reputation. You will then distribute selling factors, brand deals and more to earn extra \$\$\$.

Requirements: Let's verify the steps before we earn the stacks. Before beginning, it is required that you initialise these concepts: Sites to register:

- Instagram (New account)
- Mail.com Account
- Fameswap Account
- GramUp Extension Resources to gather:
- Modelling photos (Examples in Resource 6 Package)
- Affiliate programs (Pointsprizes, Amazon Affiliates, etc.)

Technique 6.

1) Create a valid, non-spamming looking Instagram profile. Now you may be wondering, why? Well, you are creating an Instagram profile centralized in posting popular niches and then providing monetizing techniques such as affiliation to generate money. Posts can range from memes to modelling poses, it is all your choice in the end.

2) When creating your profile, make sure to include an attractive name that will capture an audience as well as a salient profile. If you are having trouble, here is the sample profile Income Makeover used to distribute this method correctly: To efficiently distribute a valid, eye-catching profile, you will need to comply with these factors: for a Profile Picture: Don't use spam or over-used modelling photos. Instead, use keywords combined with a search engine to find under-rated eye-catching photos. Username: This can literally be anything you want, just make sure it does not seem spammy such as: "hotgirlxx, etc".

The Bio/Description: is the most important factor of your profile, with your registered email from mail.com. Make sure to put this into your description. This is so business models/companies can message you about deals that can lead you to massive cash deals. Include a "Dm me for business enquiries" section. Finally, make your profile look less spammy with contents such as hobbies, favourite artists, etc.

3) Now that you have a valid profile, it is time to add some content onto your Instagram page! Personally, when Income Makeover was conducting this method for trial, memes and model photos brought the highest popularity. It is recommended that you include normal photos such as restaurants and iconic places, etc. to make sure Instagram does not flag your profile as spam. To enquire and generate some posts, simply visit the "Posts" folder and implement each of the ideas into your page. Pull down several examples of posts.

4) Now with every post include several tags so it will generate more traffic. To do so, Income Makeover has provided a revolutionary tag generator which will not only generate tags, but privatise those with popularity filters to aid your posts. Simply generate some popular tags relating to your posts keyword and integrate them! Program Example is:

<https://i.imgur.com/hthlfnc.mp4>

Tag Integration: Open your notepad and type 5. Paste the tags collected by the Tag tool. Copy and paste the description from your notepad and add it to your post!

5) Now that you have an Instagram profile and some posts on it, the next area to integrate is Instagram automation. This specific tool automates your Instagram account, drawing gaining likes and followers 24/7 without paying a single cent. To conduct this, visit this site: <https://www.bot4gram.com> and install the program on your mobile device.

6) After the bot is installed a setup/login page appears, you can login your Instagram account and proceed to the dashboard. The rest is self explanatory, set settings customised to your own expectations and leave the bot running, sending to your account 100-1000 followers per day without using but only a few other techniques. You can also search for other automation bots available on PCs such as Somiibo, Jarvee, etc.

Average Followers per day without Automation:

With Automation + Active Posting:

7) Now that your Instagram profile has been completed with an active fanbase + frequent posts to bring hits, it is time to monetize your Instagram page. The first and foremost technique is affiliate marketing. To do this you

will be required to be signed up to an affiliate site which pays cash for offers, sells, etc. When Income Makeover tested this method, Points Prizes integrated with Amazon Affiliation was selling products. Constantly create stories + posts advertising to your affiliation. This can be posted in your posts description and solely create for the affiliate. Here is an example post including Points Prizes (Make sure to create stories as well!).

8) Now that you are constantly promoting sites and have an active/trustworthy Instagram account, it is recommended to keep pushing forward and progress for at least 2 months. In the long run you will not need to advertise affiliation but rather brands will want to sign deals for major cash deposits! If you do not want to do affiliation, you can share shortened links from linkvertise or any other service for extra earnings. This works and will put money in your pocket as well!

9) Then, after 2 months of growth for your Instagram account, followers should start to basically rain onto your account. This means that it is time to either continue growing or sell your account (recommended).

After a recommended value of 50K followers, your account can reach the economic value of \$300-\$10K+ depending on buyers. This is massive and can be earned instantly. To sell your Instagram account, visit fameswap and register an account. Then list your account for sale.

10) After listing your account, simply wait for a bid and accept the payment for instant cash! Remember: make sure to have at least 50K followers. If your having trouble with price recommendations, here is a list to help:

Instagram Price List: 30K Followers - \$200 50K Followers - \$400-500
100K+ - \$1000-\$10K+

11) Conclusively, that's it! You can repeat the steps unlimited times with alterations to earn quick cash. The main tip and strategy to properly execute this method is to have consistency when posting + an underrated theme for your Instagram account. Good luck with earning!
