Disclaimer: All Paypal information (address, name, postal, email) is stored. Should you decide to chargeback, all information will be publicized and I will personally take action against any individuals.

Hello and thank you for purchasing. Before we begin, I would like to thank you for purchasing and if you have any questions, please do not hesitate to contact me.

Requirements

- a) \$10 or less to invest
- b) A mobile phone (or pay someone on HF to verify the number)
- c) Either a Skrill, PayPal, or Payoneer account.

A brief rundown of the method is selling cracked Fortnite accounts on Playerauctions. Accounts you purchase for \$0.50-\$1.00 can be easily resold for \$20-\$50. I know this sounds “too good to be true” but trust me, it works. Fortnite is an extremely popular game. If a child asks their parents to purchase an account for them, would they search for cracked accounts on sketchy forums? No, they would head over to large websites and companies such as Playerauctions and Ebay.

Step 1

Firstly, head over to <https://account.playerauctions.com/register.html> and sign up for an account.

IMPORTANT: Use legitimate information, there is a chance the system will pick up on false information and suspend your account. If your account is suspended, there will be a 404 error everytime you click anything. This is extremely simple to solve, simply head over to HF and pay someone to make you an account.

The screenshot shows a registration form with the following fields and options:

- Username (with person icon)
- Email (with envelope icon)
- Password (with lock icon)
- Confirm Password (with lock icon)
- First Name (with person icon)
- Last Name (with person icon)
- Address (with location pin icon)
- City (with building icon)
- Zip Code (with house icon)
- Select a country (with globe icon and dropdown arrow)
- Phone Number (with phone icon, "+1" prefix, and "SEND" button)
- PIN Code (with shield icon)
- Notify me about the latest deals and offers. (with bell icon)
- Yes (with radio button)
- No (with radio button)

I have had many accounts made, just for \$5 or less.

Step 2

Now we require some inventory. We will mainly be looking at accounts in the \$0.25-\$2.00 range.

Here are some of my suppliers that I use for cheap account purchases.

Note: Any purchases you make are at your own discretion, and I am not responsible for any scams. We are however going to be dealing with very small amounts, so the chance of you being scammed when purchasing accounts is extremely small.

Keep in mind that these are cracked accounts, so the owner may change the password. I recommend changing the password to a different one for all of your accounts, then after a week or so if the password has still not been changed from what you changed it to, you can conclude the account is inactive. The reason for this is because there are usually no issues with inactive accounts being reclaimed.

Step 3

Now here is how we sell accounts. After you have registered on PA, click “Become A Seller” and link a payment method. Now you are qualified to sell on Playerauctions.

Click “Create New Offer” or “Create Offer” to begin listing your accounts.

Under “Select Product” press “Accounts” then select Fortnite as the game and PC as the server. Also, make sure to make your offer visible for 30 days, and not 7.

Step 4

Now here is the important part, setting your price

Price Management

Set your price according to your goals!
TIP What is your price strategy? Do you want to adjust the price of your for sale listing to be competitive with other sellers, or is how much you are paid the most important? Enter an amount in either Listing Price or Estimated payout and we will automatically update the value!

Listing Price: \$ Estimated Payout: \$ **Clear**

Listing price:
This is the price which will be listed in the for sale offer listing browser, and will be the price the buyer sees at the check out.

TIP Estimated Payout Amount:
The payout amount is estimated disbursement value, you will receive. Insert what you want the payout amount to be and we will automatically update the listing price for you.

Here is a quick pricing guide:

1-10 Skins = ~\$5 (cost = \$0.01)

10-19 Skins = \$5-10

20-29 Skins = \$10-\$15

30-39 Skins = \$15-\$25

For 40-60+ Skin accounts, you should be able to get \$40-75 for some accounts

Step 5

Detailed Offer Description

Offer Title: 150 characters left. Please do not enter HTML in your title.
(Maximum image size: 1024K, Allowed image file formats: JPG, JPEG, GIF, PNG, BMP)

Description:

TIP Do not share your Discord, email, Skype, PayPal, or other personal information. We will suspend anyone who violates our safety policy.

Next up is setting up your offer. For the title my titles are usually as follows:

Skin # | Battle pass or not - List a few skins

Example: 27 Skins | S7 Battlepass - John Wick, Elite Agent, Spider Knight, Fate, Omen, Sun Strider & More!

Obviously you can change up your titles to include rarer and more sought after skins.

You can make your offer however you'd like, make sure to include a link to the pictures though.

I personally gyazo everything and drag all the pictures into imgur, then add an imgur link.

It is beneficial to include things such as a lifetime warranty to gain attention.

Important: Do not include “No email access” or “cracked account” ANYWHERE in your title/offer, they are forbidden to be sold. Luckily, the offer and title is the furthest PA will search to see if sellers are selling such accounts.

~Optional: You can also include offers such as “25+ Skins - Random Account” to save yourself some time. Simply provide a sample of an account with 25+ skins (make sure you label that it's a sample) and also include that you are not responsible if the account does not work on consoles.

Step 6

The next step is the delivery of the account. You can either set the delivery as automated, or manual. If you choose manual delivery, make sure you select “24 hours” as your timeframe to deliver. If you do not deliver within your deadline, you will be penalized.

The screenshot shows a dark-themed form titled "Automatic Delivery". At the top, it asks, "Would you like to have your account automatically delivered by PlayerAuctions?". Below this question are two radio buttons: "Yes" (which is selected) and "No". A red instruction reads, "Press 'Submit Information' in popup to save." At the bottom, there is a yellow-bordered box containing a "TIP" icon (a lightbulb) and the text: "By selecting this option, PlayerAuctions will ensure the automatic delivery of your account. Once a buyer purchases your account, your account's information (that you will need to enter below that section) will automatically be sent to them by e-mail. This ensures a quick delivery and you won't even have to be online for the transaction."

If you click “yes” simply fill in the pop-up and you’re good to go. The next thing to do is click “Create New For Sale Offer” and your offer will be listed.

Disputes

Disputes are going to be inevitable. If a buyer is unhappy with their account, make sure to try to resolve the issue without it being escalated to playerauctions.

IMPORTANT: If a buyer disputes and has input the amount they are disputing for as “\$0.00” instantly accept the dispute. You are only able to dispute once, and if you accept the dispute you will be sent the full amount.

Playerauctions is notorious for siding with the seller for the majority of situations, just make sure you are not acting sketchy and always remain professional when speaking with the buyer during disputes.

IMPORTANT INFORMATION - MUST READ

Before we begin, please keep in mind if your account gets suspended, you will be locked out of any pending disbursements. Playerauctions will never chargeback any payments, so do not worry about that.

The following tips I have have been found from trial and error, I have probably lost close to a thousand dollars from suspended accounts until I mastered their system.

1. - If the buyer disputes claiming the account information is incorrect on login (even if you gave them the correct info), **accept the dispute and give them the refund.** There is ZERO tolerance for sellers giving incorrect information, and you will be suspended if the buyer escalates the dispute. If you ignore this and get your account suspended, your pending disbursements will be held. This situation is simply not worth the hassle of your \$1 investment.
2. - As mentioned previously, make absolutely no mention that the account is not email access or cracked. You will first be warned, then suspended.
3. - If a buyer is skeptical since they are not receiving the email details, simply give them a few more accounts, and keep pressing on them that you have a lifetime warranty, as you can replace their accounts for extremely cheap (do not mention that part) This is also if anyone leaves you negative or neutral feedback. You can only change feedback once, so if they change it from neutral/negative to positive they can never change it back from positive.

Disputes

A few buyers have asked me about disputes, so I figured I would write a bit more about it. There are usually 2 options a buyer will select when disputing

“I changed my mind and no longer want it”

This is considered “buyers remorse.” It is a valid reason to dispute, however Playerauctions will never side with a buyer in such cases. Simply reply with “Buyers remorse is not a valid reason” and you should no longer have any reason to respond. Optionally you could also offer a partial refund to resolve the situation.

If no resolution is reached, select “Escalate Dispute” and the dispute will be escalated to Playerauctions in 24 hours.

“Game account locked/recovered/banned”

This will usually be the most common reason. The easiest way to resolve this situation is by messaging the buyer directly and replacing the account. After you have replaced the account and the buyer is satisfied, ask him to agree to your dispute and you will be sent the full amount.

Payouts

Payments are sent out everyday except Friday and Saturday at 12 AM PST.

When a buyer purchases your account, they have 72 hours to confirm the delivery. You can message them and ask them to confirm delivery as many to not realise they are supposed to.

After delivery has been confirmed, your payment will be queued for processing, which will take 2-3 days.

Here is one payout of many, good luck and please let me know if you have any questions!
